The #1 Supercomputers Depend on Mellanox HPC Solutions. The need to analyze growing amounts of data, to support complex simulations, to overcome performance bottlenecks and to create intelligent data algorithms requires the ability to manage and carry out computational operations on the data as it is being transferred by the data center interconnect.

Mellanox High Performance Computing Components ...

GPU computing is the most accessible and energy-efficient path forward for high performance computing (HPC) and the data center. In fact, five of the six Gordon Bell Prize finalists use supercomputers powered by NVIDIA GPUs.. Today, NVIDIA powers the fastest supercomputers in the U.S. and Europe, as well as some of the most advanced systems under construction.

Cloud computing is the on-demand availability of computer system resources, especially data storage and computing power, without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet. Large clouds, predominant today, often have functions distributed over multiple locations from central servers.

A single fabric infrastructure is increasingly considered the optimal solution for network build-outs not only high-performance computing environments, which is predominantly InfiniBand-based, but also in mainstream enterprise grids, and in data center enterprise server, storage, and virtualized environments. The low-latency, high-performance, and efficient CPU utilization provided by Mellanox ...

Cloud computing business solutions like Microsoft Azure and Amazon Web Services enable you to put costly IT resources in the cloud. With so many options, choosing the right mix for your business needs can be overwhelming. Here are some types of cloud computing business solutions and ways to integrate these technologies in your business this year.

7 Types of Cloud Computing Business Solutions ...

Simply put, cloud computing is the delivery of computing services—including servers, storage, databases, networking, software, analytics, and intelligence—over the Internet (“the cloud”) to offer faster innovation, flexible resources, and economies of scale.
